EDITORIAL: welcome to the new editors

CLAUDIA LAGO
DÉBORA LAPA GADRET
FÁBIO PEREIRA
KÉRLEY WINQUES
LIA SEIXAS
LAURA STORCH
NÉLIA DEL BIANCO

Brazilian Journalism Research has been conducting, throughout the years, a series of significant alterations to its editorial structure, aiming at the systematic improvement of its practices and processes, as well as the consolidation of its institutional mission, particularly when it comes to contributing to strengthen the network of journalism researchers both nationally and internationally. Renewed internal practices follow the journal's expansion, which is a result of **BJR's** consolidation in an international context. **For this reason, we understand the need to make additions to our group of editors, which includes three new members from this issue on: Débora Lapa Gadret (Unisinos University), Kérley Winques (IELUSC College) and Nélia Rodrigues Del Bianco (University of Brasília).**

The new configuration of our Editorial Board expands our ability to respond to yearly submissions, ensuring quality and celerity to editorial processes. Our new members are part of **BJR'**

history, having published papers in our previous issues, and having aided systematically to the evaluation of research submitted to the journal. In this issue, the reader can verify the effectiveness of this contributions: it can be noted that one of the new editors had recently contributed with the review of submitted papers, having one of her evaluations published in our repository as part of our Open Science politics.

As we welcome our new editors, we highlight that their cooperative spirit is recognized by our Editorial Board as one of the many qualities of these researchers, all of which attest to their ability to exert their news roles as editors. We hope that researchers that submit their papers to **BJR** can confirm, in the years to come, our dedication to the editorial work and the effectiveness of the group that, with new reinforcement, keeps devoting itself to the quality and development of **BJR**.
